

Ted D Miller Associates Inc. Water & Wastewater Instrumentation Solutions

12081 West Alameda Parkway # 502 Lakewood, CO 80228

303-989-7737

sales@tdma-inc.com www.tdma-inc.com

Complete line of peristaltic and vacuum pump automatic water and wastewater samplers, open channel flow meters, clamp-on full pipe flow meters, multi-parameter sensors

www.teledyneisco.com/en-us/water-and-wastewater

Advanced motor and pump performance analysis and volumetric flow meters <http://www.maidlabs.com>

Portable and fixed, transit time, ultrasonic clamp on non-invasive liquid flow meters www.clamponflow.com

Palintest®

Leader in providing water test kits for drinking water, wastewater and process water, environmental and soil analysis products plus portable water quality laboratories <https://www.palintest.com/en>

On-line and portable turbidity and chlorine analyzers <http://www.hfscientific.com/>

Surface water sampling/ monitoring, groundwater level monitoring, meteorological stations <http://www.globalw.com>

ROSEMOUNT®

Offering a full line of innovative Measurement and Analytical technologies for pressure, flow, level and temperature measurements, and liquid analysis.

Magnetic, differential pressure and Vortex flow meters; gauge, differential and hydrostatic pressure transmitters; ultrasonic flow and level monitoring, radar level, bulk solids measurement; high performance pH, conductivity, chlorine, fluoride, dissolved oxygen/ozone, and turbidity sensors and analytical analyzers <http://www.emerson.com/en-us/automation/rosemount>

World-leading highest performing Coriolis flow and density measurement devices available today <http://www.emerson.com/en-us/automation/micro-motion>

Comprehensive line of digital display and control instrumentation <https://www.predig.com>

Screening, aeration, dewatering, sludge thickening

CORNCOB II Dynamic Membranes - advanced membrane filtration system that moves the membranes and not the liquid resulting in significant cost savings, reduced application restraints. <http://www.proequipment.com/>

s::can

Intelligent. Optical. Online.

Online analytical monitoring systems for drinking water, wastewater, industrial water, and environmental applications

World technology leader for submersible online UV-Vis spectrometer probes <http://www.s-can.us/en/>

On-line optical DO, SS, pH, and ORP analyzers for use in water and wastewater treatment plants www.insiteig.com

KPSI and TruBlue level and pressure measurement www.te.com

IBR recognized leading particle counters <http://www.nasecglobal.com>

Fiberglass flumes, and buildings, enclosures, and metering manholes <http://tracomfrp.com>

TDMA Service offering flow meter calibration and verification services and Isco instrument repair jeremy@tdma-inc.com
